Thought Process

Part (a) of the question requires knowledge of nutrients and enzymes.

The answer to this part must be general, not specific. For instance, 'carbohydrase' is preferable to 'amylase'. This is because the rest of the names in the figure are general names.

Part (b) of the question requires the names of the food tests used to identify the various nutrient classes and positive results that are obtained to be stated (for example, blue-black colour is observed if starch is present). Note that the nutrients shown in the figure are a complex carbohydrate, a protein and a fat.
