C. Thread the machine with your left hand while firmly gripping the thread with your right hand in the following order as illustrated.

*Pass the thread through the thread take-up (3) from right to left.
 *Pass the thread through the eye of the needle (5) from front to back. (See following page for instructions on operation of the Automatic Needle Threader.)

IMPORTANT: To verify that the machine is threaded properly in the tension discs, do this simple check:

- 1.) With the presser foot raised and the needle threaded, pull the thread. You should detect only a slight resistance and little or no deflection of the needle.
- 2.) Now lower the presser foot and again pull the thread towards the back of the machine. This time you should detect a considerable amount of resistance and much more deflection of the needle. If you do not detect the resistance, this means you have not threaded the machine correctly and need to rethread it.

C. Enfilez le fil de la machine avec votre main gauche tout en tenant le fil fermement de la main droite, dans l'ordre suivant comme montré dans l'illustration.

* Faites passer le fil par le releveur de fil (3) de la droite vers la gauche.
 * Faites passer le fil par l'orifice de l'aiguille (5) de l'avant vers l'arrière. (Reportez-vous à la page suivante pour les instructions concernant le fonctionnement de l'enfileur de chas d'aiguille automatique.)

IMPORTANT: pour vous assurer que la machine est correctement pourvue de fil dans les disques de tensions, effectuez cette simple vérification.

- 1.) Avec le pied presseur relevé et l'aiguille non-enfilée, tirez sur le fil. Vous ne devriez sentir qu'une légère résistance.
- 2.) Ensuite, abaissez le pied presseur et tirez de nouveau le fil vers l'arrière de la machine. Cette fois, vous devriez sentir une forte résistance. Si vous ne sentez pas de résistance, le fil a été mal enfilé et vous devez le ré-enfiler.

C. Enhebra la máquina con su mano izquierda mientras toma firmemente el hilo con su mano derecha en el orden siguiente tal como está ilustrado.

* Pase el hilo a través del tirahilos (3) de derecha a izquierda.
 * Pase el hilo a través del ojo de la aguja (5) de adelante hacia atrás. (Continúe con la página siguiente por instrucciones sobre el funcionamiento del ensartador automático de agujas.)

IMPORTANTE: Para verificar que la máquina ha sido bien enhebrada en los discos de tensión, realice esta verificación sencilla:

- 1.) Con el prensatelas levantado y la aguja sin enhebrar, jalar el hilo. Deberá detectar solo una ligera resistencia y una pequeña o ninguna deflexión de la aguja.
- 2.) Ahora vuelva a bajar el pie prensatelas y vuelva a tirar del hilo hacia atrás de la máquina. En ese momento deberá detectar una cantidad considerable de resistencia y mucha más deflexión de la aguja. Si no detecta la resistencia ha enhebrado mal la máquina y deberá volver a enhebrarla.

Honeywell 6160 address.

(Check with your installer for the availability and type of alarm of these panic keys). Special function keys: These are the four keys located to the left of the number keys (see more below). The opening in the case again. Follow these steps to ride and wire the keyboard: 1. 2. B ADEMCO 6160RF keyboard / transceiver User guide Keyboard and LED screen The 6160RF has the following features: A e A, A e LCD Backlit Large, 2 lines, 32 Alfanumerical characters. Open CKT Contact your installer. B. The following table shows LEDs and their functions: LED function Armed lights (red) when the system is armed in any mode. Sonunder The built-in loudspeaker has the following functions: A e A e A, A e e Produces warning sounds during alarm conditions and problems, and also during the input / output delay periods. Push the two instantaneous release of the box at the bottom of the keyboard with the blade of a medium screwdriver (this will push on the release setting), then pull on that side of the box towards Care. The table describes error messages and corrective actions. Delete the case of the keyboard box provides access to the terminal blocks. Control panel to the terminals in the 6160RF according to what is indicated in Figure 2 and Table 1. Check 100 Post contact with your installer. If the surface wiring is being used, the wiring can be routed through the top or output on the lower left side in the box towards Care. Features A e A e e Supports Wireless Key Transmitters (E.G., 5804) and Bi-Directional Transmitters (E.G., 5804BD, 5828 / 5828V). A e A e e Supports RF Jam Detection when the Receiver is enabled. The 6160RF Must Be at Least 10 Ft from The Control Panel to Ensure Proper Operation of the RF Receiver. (See the Control Panel's Instructions for Proper Run ;.g.e(.e(yllibapac jnoitpyrcne(ytiruces-hgih htiw syek sseleriw stroppuS eAAeA .noitavitca mrala cinap rof syek edulcni syek noitcnuf ehT - syeK noitcnuF).syek eseht fo esu eht no snoitcurtsni deliated rof lenap loitnoc eht seinapmocca taht ediuG resU eht kcehC(. 3. a Install 3 6160RF Locate the 6160RF in a location and at a height where it is convenient for user 3. Figure 2 - 6160RF Wiring Details K0903V1 a a 2/06 Rev. Shoots should be punctured using a screwdriver before mounting the case back. Repeat on the other side. Replace the transmitter if the final transmitter does not have a replaceable battery. The following 5800 series transmitters are not designed for use in UL installations: 5802, 5804, 5804BD, 5804BDV, 5804E, Uuull 5814, 5816Temp, 5819, 5819BRS, 5819WHS, 5828 / 5819WHS, 5828 / 5828V and 5850. Insert the screwdriver on the side of the screwdriver keyboard. (between the front and rear) and rotate gently to release the side lock position. a e e Capable of sending status messages (armed, ready, etc.) to two-way units such as 5804BD, 5804BDV, and 5828 / 5828V. GENERAL INFORMATION The ADEMCO 6160RF keyboard / transceiver is a combination unit. 3 combines the functions of the following devices: Ae a e 6160 alphanumericA e addressable keyboard ae a e 5881H RF receiver Ae a e 3 dual 5800TM transmitter The 6160RF keyboard / transceiver can be used in any Control Panel that supports 5800 series end-devices (e.g., VISTA-10P, VISTA-15P, VISTA-20P). Whether these buttons work and the type of panic alarms they produce is determined by the ability and programming 3 of the control panel. The 6160RF has terminal blocks for connection 3 power 3 and data cables. ARMED LIST NOTE: To remove the rear cover, press the two mounting snapshots located along the bottom of the keyboard and the 3 cover.
